

Dale McMillan CV

I didn't discover the wonderful world of masters athletics until my mid-forties, not even realising its existence before then. However since then, I have been both an ANZ & Masters competitive member and am also an associate member of both the local Manawatu Striders and Feilding Moa clubs.

I have been on the MWMA committee since 2016 and have worked hard on updating and reinstating our MWMA records. I have also just recently joined the PNAHC committee.

Over the years, I have tried most (but definitely not all) events and consider myself to be a bit of an all-rounder, with the Track Pentathlon being my most successful event. In the off season, I try to maintain fitness by competing in both cross-country and road racing events. For this reason, I feel that I can offer a diverse perspective across many different areas.

In addition, my partner and I ran our own farming business for over 16 years which gave me valuable office experience and transferable skills that I believe could be of benefit to the board.

I would love to see Masters Athletics grow and thrive and become a seamless transition across the ages. To find ways to attract more members by creating a good strong team environment that people want to belong to and be a part of.
